

Map 4.7

Transportation to parents' preferred school for their child if money was no object

ABOUT THIS MAP

1. This map uses raw data from the survey.
2. It illustrates how parents would transport their children to school under the choice of any secondary school if money was no object scenario, using colour-coded lines to identify their preferred mode of transport.
3. The scale is 1:60,000.
4. A total of 76 parents are displayed on this map.
5. Two parents (ID numbers 360 and 380) and the 25 parents who did not know which school they would choose were ignored, as for map 4.3.
6. One parent (ID number 147, in Templeton) is excluded from display on this map.
7. Four parents (ID numbers 58,130, 142 and 153) were also excluded because of missing data for this question.
